ABOUT ME

Cyber Security Master's student (EQF Level 7) specialising in SOC operations: SIEM-based log analysis (Splunk), threat detection, and incident response. Hands-on with Kali Linux, NMap, Wireshark, and Burp Suite for network security monitoring, vulnerability assessment, and penetration-testing fundamentals; trained in Active Directory, Windows/Linux system security, and the OWASP Top 10 through TryHackMe. Three years' production experience at Infosys spanning Azure cloud infrastructure, cryptographic key and SSL certificate management, and disaster recovery/business continuity. Working knowledge of GDPR and ISO/NIST compliance frameworks, identity and access management (IAM), and computer forensics for incident investigation. Seeking a SOC Analyst role in Germany, with a path toward Security Engineering.

EDUCATION

Master of Science in Cyber Security — IU International University of Applied Sciences, Berlin, Germany

10/2025 – Expected 09/2027 | EQF Level 7

- Cybersecurity risk management and governance: cyber risk assessment, IT governance, compliance, and data protection regulations such as GDPR
- Applied cybersecurity technologies: cryptography, secure networking, and secure software development across hardware and software environments
- Threat analysis and defence techniques: attack models, auditing, penetration testing concepts, and cyber forensics for incident investigation
- Security operations and research: incident response, security testing, and standards/frameworks such as ISO/NIST

Bachelor of Engineering in Computer Science — SDM Institute of Technology (SDMIT), Ujire — VTU, Belagavi, India

08/2018 – 07/2022 | EQF Level 6

- Core computer science and programming: data structures, algorithms, C/C++ programming, and software design and development
- Networking, database systems, and computer architecture: operating systems, computer networks, and database management systems
- Cybersecurity fundamentals and IT law awareness: cyber law, basic security concepts, and system protection mechanisms

WORK EXPERIENCE

Senior Systems Engineer — Infosys

Bangalore, India | 08/2022 – 09/2025

- Managed SSL certificate lifecycle and RMS/non-RMS cryptographic key renewals, maintaining secure access controls for a production application
- Led annual disaster recovery exercises, ensuring business continuity readiness for critical Azure-hosted applications
- Provisioned and maintained Azure cloud resources and Redis cache for a global application, supporting secure and reliable infrastructure operations
- Ran SQL queries to extract and validate application data in support of maintenance and troubleshooting
- Contributed to MEAN stack development as part of a full-stack engineering team on a global Unilever project

PROJECTS

AI-Powered SIEM Dashboard — Personal Project

Live: siem-dashboard-lyart.vercel.app | GitHub: github.com/SharadKesariMN/siem-dashboard

- Designed and built a full-stack SIEM platform replicating core SOC analyst workflows: log ingestion, normalization, real-time correlation, and incident triage

- Built a log ingestion pipeline (syslog + REST API) and normalization engine extracting structured fields (user, IP, event type) into a common schema
- Built a real-time correlation engine detecting SSH brute-force, port scanning, and privilege escalation, mapped to MITRE ATT&CK techniques and tactics
- Integrated the Claude API to auto-generate plain-English incident summaries and recommended response actions for every alert
- Developed a React dashboard with a live alert feed, severity/timeline visualizations, and a searchable log explorer with per-alert investigation pages
- Implemented session-based authentication and an optional Splunk HEC forwarder to support hybrid deployments alongside existing SIEM tooling
- Containerized the stack with Docker Compose; deployed to production via CI/CD auto-deploying from GitHub to Render (backend) and Vercel (frontend)
- Built a one-command attack-chain simulation script (recon → brute force → privilege escalation) to validate detection logic and support live demos

TECHNICAL SKILLS

Threat Detection & Incident Response · SOC Operations · Computer Forensics · Network Security · Risk Assessment & Management · Identity and Access Management (IAM) · Cryptography · Cyber Security & Data Protection · Log Analysis · Secure Software Development · Vulnerability Assessment · Penetration Testing Fundamentals · Exposure Management · Compliance (GDPR, ISO/NIST) · Corporate Governance

TOOLS AND TECHNOLOGIES

Splunk (SIEM) · Kali Linux · NMap · Wireshark · Burp Suite · Active Directory · Microsoft Azure · Docker · FastAPI · PostgreSQL · Redis · React · Claude API · Git / GitHub · Power BI · Microsoft Office

Languages/Stacks: Python · SQL · Java · JavaScript · HTML/CSS · MEAN Stack · Linux · Windows

CERTIFICATIONS AND TRAINING

TryHackMe — Cyber Security 101 — Online

05/2026

Hands-on training covering computer networking and cryptography, Linux/Windows/Active Directory fundamentals, offensive and defensive security concepts, and OWASP Top 10.

TryHackMe — Pre Security Learning Path — Online

03/2026

Foundational training in cybersecurity fundamentals, networking basics, operating system concepts, and web technologies.

Tata Consultancy Services (TCS) — Cyber Security Analyst Job Simulation — 01/2026

- Completed a job simulation in identity and access management (IAM) with a Cybersecurity Consulting team
- Applied IAM principles and cybersecurity best practices aligned to business objectives
- Delivered documentation and presentations communicating technical concepts to stakeholders

LANGUAGE SKILLS

English: Fluent | German: A2 | Mother tongue: Kannada | Hindi: Fluent

PERSONAL DETAILS

Date of birth: 06/02/2001 | Nationality: Indian
